What you'll learn

By the end of this course, you will be more equipped to...

- explain the importance of digital marketing in today's world and provide a comprehensive overview of its core components.
- understand and differentiate between key elements of the digital marketing mix, such as SEO, SEM, social media, and email marketing.
- demonstrate the ability to critically analyse successful digital marketing campaigns and derive key takeaways for future applications.
- understand how search engines function, the significance of SEO, and should be able to conduct keyword research and selection for websites.
- implement on-page optimisation techniques, including title tags, meta descriptions, and heading tags, to improve a website's search engine ranking.
- use off-page SEO strategies, encompassing link building, social media utilisation, and local SEO for enhancing website visibility.
- to create and manage effective Google Ads campaigns. They will understand keyword selection for PPC and be able to measure and optimise campaign performance.
